

Database Technologies - Assignment 8

Use sub-query to solve following problems.

Note: To solve below queries, use “sales” database

1. Write a query that uses a subquery to obtain all orders for the customer named Cisneros. Assume you do not know his customer number (cnum).
2. Write a query that will find all salespeople who have no customers located in their city. (Hint: Choose the correct keyword ANY/ALL).
3. Extract all the orders of Motika.
4. Find all the orders of salespeople servicing customers in London.
5. Find names and numbers of all salesperson who have more than one customer.
6. Select customers who have a greater rating than any other customer in Rome.
7. Select all orders that had amounts that were greater than at least one of the orders from '1990-10-04'.
8. Select those customers whose rating are higher than every customer in London.
